**Client**  
RMIT University

**Architect**  
Odoriso & Stolfo Architects

**Interior Designer**  
Tel Stolfo Design

**Builder**  
Stosius & Staff

**Budget**  
\$350,000

**Location**  
City Campus

**Year**  
2014

## Project:

This new multi-faceted 'campus store' is one of the only two stores in RMIT across all campuses. It was developed with the concept of a 'bookstore' selling multiple products such as books, RMIT branded apparel and tour services. It boasts a strict style guide & brand guide with the flexibility of being continually evolved and updated. The store allows for the display of products and the user experience.

## BE Contribution:

BE was responsible for design and implementation of the full scope of building services including lighting & accent lighting, power, telecommunications, fire protection, audio visual, security, air conditioning and ventilation. BE was actively working with the project team of project manager, various departments in RMIT, QS, end user group, architect, interior designer and other stakeholders to deliver this magnificent new campus store, both the front shop and the back of house.

The existing unappealing interior and aged services imposed a significant challenge given the limited budget.

During the design and development stage, BE demonstrated exceptional flexibility in accommodating evolving changes of interior design. Assisting in budget control, BE presented to stakeholders a number of services design options with cost estimates. The project was completed on budget and on time.
